1. The VEB RFT Funkwerk Koepenick from time to time works on so-called SAG orders (SAG Auftrage). One of the current orders is for two oscillogram-analysers, to be completed by 29 June 1953. These were ordered through the "Hauptverwaltung" ^{1/} located on the premises of the Knorr-Bremse plant in Berlin O-112. Two Soviet officials have come to the Funkwerk on this order; one is (fnu) Popov of the "Hauptverwaltung," the other allegedly comes from Moscow; he is named (fnu) Antonov. Antonov is said to visit Berlin from time to time.
 2. The remaining SAG orders placed at Funkwerk Koepenick are for individual SAG plants located in East Germany. For example, the Low-Frequency Section of the plant is developing a "Bunkerstandsanzeiger," a device to show the level of material contents of a bunker, for the Ernst-Thaelmann plant in Magdeburg.
- ^{1/} Comment: The "Hauptverwaltung" (Main Administration) presumably refers to the Scientific-Technical Bureau for Instruments, NTB-3, in the Neue Bahnhofstrasse, Berlin O-112.
